Nyaka Primary School  
Kanungu- Uganda

### FROM BEAUTY TO DOOM

My country Uganda also referred to as the Pearl of Africa because it's beautiful vegetation and climate.

It was and have been for so many centuries.

However, that beautiful name is likely to change if no action is done to this menace. Climate change that has been brought about by global warming. Our country and the world at large are at risk of its inhabitants running out of extinction due to their reckless activities.

Human activities such as deforestation, industrialization, and the use of fossil fuels have made the conditions worse

As the saying goes, "Man reaps what he sows", those reckless activities have been sowed and climate change and its effects reaped. The effects such as floods, rising temperature, landslides, droughts, and very heavy rains make me feel worried if I will have a chance to see my children and the children of my children.

I feel very worried because very many people have lost their lives, property, and land. For example, in the Uganda-Kaseses district, a river called Nyamwamba flooded and swept away many homes including Kilembe Hospital in which many people lost their lives. Different roads connecting to my district in Kanungu, have been spoilt by heavy rains and this has affected trade, health, education, and transport.

Let everyone come to know that nature can exist without man but man cannot exist without nature. When we destroy nature, we are putting our existence to an end.

It is my cry to everyone to stop those reckless activities that bring us from beauty to doom. Protect all the treasures of nature.
